2020

In 20 years of business Beorol has become a leading company in the region in the field of the production of painting tools as well as the import and distribution of hand tools and accessories for construction work, protective equipment, technical chemistry, gardening and home programs. All this indicates that the Beorol products and the breadth of the product range justified the trust shown by our customers. We are proud to have assisted you in all these years in arranging and embellishing your homes.

So we decided to offer you something more. Namely, our range is constantly expanding and adapting to your needs and desires. In addition to being of high quality and affordable prices, Beorol products are easy to use and allow you to work completely independently, without intermediaries and at no extra cost.

BEOROL PRODUCTION

BEOROL IS A LEADING BRUSH MANUFACTURER ON THE SOUTH EAST EUROPEAN MARKET.
Brushes are an inevitable tool for every painter who works with paint and color. To meet all the needs of the painters, Beorol produces brushes of different performance characteristics. We developed a system of using and combining the highest quality raw materials from around the world.

BEOROL IS A LEADING MANUFACTURER OF PAINT ROLLERS ON THE MARKET OF SOUTHEAST EUROPE.
In our business we have developed two types of production:
• Production of thermofused paint rollers and
• Production of sewn paint rollers.
By doing that we got a wide range of paint rollers and radiator paint rollers.

PRODUCTION OF BRUSHES

CAPACITY

17 million brushes

PRODUCTION OF PAINT ROLLERS

HOW TO CHOOSE

THE RIGHT PAINT ROLLER?

SEWN PAINT ROLLERS

Paint rollers are produced by a combined thermofusion process and sewing. The plastic tube and the polyurethane foam are fused into one unit by thermofusion to give a supporting structure with increased surface elasticity. A sewn and rolled fabric is pulled onto the tube thus obtained. Stretching gives a strong surface bond between the polyurethane foam and the sewn fabric. Due to the mutual elastic forces, the seam is straightened so that it is not recognized later on the sewn roller. In this way the main part of the roller is obtained, the so-called roller body. Inserts are inserted into the body of the roller, which are connected to an axial tube in which the fuse is located. Through the shaft tube and the fuse, the wire of the roller handle is threaded to produce a complete paint roller ready for painting.

The polyurethane foam inside the roller does not absorb the paint, so there can be no lag of paint after washing the roller. Sewn rollers are intended for painting uneven building surfaces, mainly semi-dispersive, dispersive and fa-cade paints. Depending on the size of the surface to be treated, it is necessary to choose a paint roller of appropriate dimensions. Our range includes sewn rollers with lengths of 18, 23, 25 and 27cm.

THERMOFUSION PAINT ROLLERS

The advanced thermofusion process is Beorol's contribution to the tool market. It fuses the plastic tube and fabric into one piece, using heat and mechanical pressure. In this way the main part of the roller is obtained, the so-called roller body. Inserts are inserted into the body of the roller, which are connected to an axial tube in which the fuse is located. The roller bar wire is threaded through the shaft tube and fuse to produce a complete paint roller ready for painting. Thermofusion rollers are designed for painting flat surfaces, different materials with different colors and varnishes, depending on the type and characteristics of the fabric. Depending on the size of the surface to be treated, it is necessary to choose a paint roller of appropriate dimensions. Our range includes 9, 18, 23, 25, 27 and 50cm thermal fusion rollers.

MJPVC	8606007991253	Steel	Ø210×160mm

beorol

GET THINGS DONE

THE RIGHT BRUSH

THE HAIR we use is among the highest quality in the world. Depending on the intended use, we use natural and artificial hair as well as combinations thereof.

THE BEOROL BRUSH handle is ergonomic, lies nicely in the hand and does not tire the master. They are manufactured in different shapes, sizes and materials (wood and PVC). It is attached to the rest of the brush by gluing and hooking.

SHEET METAL brush has the role of providing the final hair shape and ensuring that all the elements are firmly knit together into one compact unit. The sheet is made of profiled galvanized steel for its durability.

THE CROSS-SECTION OF HAIR

The full cross-section coat is of the highest quality and the other types are due to the need to reduce costs and density, taking into account that the desired characteristics are preserved.
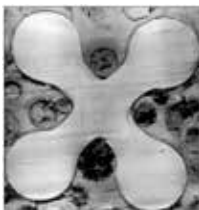

The X hair shape is good for retaining color because of its specific shape because it has a larger overall surface on which the color is retained. It also has better flexibility than a hollow hair.

The X shape has a 20% lower density than the full shape (SRT).

The 3-hole hollow hair is better colored at the ends (Flag) than the X shape, absorbs more color because of its characteristic and gives a finer finish.

The hollow is significantly ahead of the X shape in bloom, as it can bloom at 4-5 peaks.

MIX 70/30 STANDARD

A combination of 70% PBT / PET extruded hair, and 30% natural hair. The extruded hair is dominated by threads of thickness from 15mic to 18mic, which gives greater durability of the hair.

Enriched with '' X-shape '' and '' Minihollow '' hair.

MIX 70/30 PLUS

A combination of 70% PBT / PET extruded hair, and 30% natural hair. The extruded hair is dominated by strands 12mic to 15mic thick, which makes the hair softer, provides greater absorption and release of color, and a finer color application.

Increased percentage of ''X-shape'' and ''Minihollow'' threads compared to ''Standard '' hair type.

PREMIUM BRUSH

- Purpose: For all types of oil, nitro or water based coatings
- Hair Type: Mix 70/30 Plus

THE RIGHT TAPE

OUTDOOR USE	Intended for outdoor use	
INDOOR USE	Intended for indoor use	
INDUSTRIAL USE	Intended for professional use in industry for high performance	
CAR INDUSTRY	Intended for car industry	
ECO	Made of easily degradable paper materials	

HIGH TEMPERATURE RESISTANCE	The pictogram represents the temperature the tape can withstand while maintaining the characteristics	
STRENGTH	Adhesion - the adhesive strength of the product to the treated surface	
GLUE ON BOTH SIDES	Double-sided adhesive tape	
DOES NOT LEAVE MARKS OF ADHESIVE	The tape after removal does not leave any traces of adhesive	
EASY TO TEAR	Easy tape splitting for faster operation	

In order to find the best tape for your needs and to do the job properly as a real professional, you need to choose the right tape for you. Each tape is marked on the label with pictograms that tell each tapes purpose and characteristics.

RESISTANCE TO TEARING	The resistance of the tape to tearing under the influence of force	
SUGGESTED TIME FOR THE REMOVAL	Recommended hourly rate for stripping the tape from the moment you apply it to the surface	
THERMO-INSULATOR	Resistance of the tape surface to ambient temperature conditions	
THREE-LAYER	Tape made of three layers of material	
UV RESISTANT	Resistant to ultraviolet rays (UV)	
PROTECTION OF PLASTERBOARD	Designed to protect plasterboard during painting	
DOOR AND WINDOW PROTECTION	Designed to protect doors and windows during painting	

FOR PRECISION LINES	Designed for decorative and other precision work	
HIGH PERFORMANCE	High performance tape	
SUITABLE FOR VARIOUS TYPES OF SURFACES	Intended for use on various types of surfaces, wall, metal, wood, plastic	
WATERPROOF	The tape is resistant to water penetration	
MARKING TAPE	A noticeable color tape designed to mark spaces and surfaces	
PACKAGING TAPE	Designed to protect boxes and other types of packaging	

MASKING TAPE **INDOOR HOBBY**

MASKING TAPE **INDOOR PROFESSIONAL**

- Purpose: for interior painting works
- Glue type: Hot Melt
- Recommended: use on lime surfaces (wall, gypsum board)
- The recommended hourly rate for removing the tape from the surface is 24h
- Temperature resistance: 60°C
- Color: yellow

- Purpose: for interior painting works
- Type of adhesive: Solvent (natural rubber)
- Recommended for use: on various types of surfaces
- Recommended removal time: 48h
- Temperature resistance: 70°C
- International BEST-SELLER with a supreme price/quality ratio
- Color: white

MASKING TAPE **FACADE STANDARD**

- Purpose: for exterior use, surface protection during facade construction
- Type of adhesive: Solvent (natural rubber)
- Recommended for use on various types of surfaces
- Recommended removal time: 48h
- Temperature resistance: up to 80°C
- Color: yellow

MASKING TAPE **PERFECT LINE**

- Purpose: for precise painting of surfaces, decoration works, protection of gypsum board
- Type of adhesive: Solvent (natural rubber)
- Provides paint bleed protection
- It is excellent for decorative techniques, and especially for combining several techniques, it leaves no traces of glue
- Elastic paper gives the tape the ability to be used on curved surfaces for decorative work
- Recommended removal time: 48h
- Temperature resistance: up to 80°C
- Color: green

AUTO LACQUER MASKING TAPE **CAR PAINTING**

- Purpose: The tape has a tape-on-tape system, which allows it to glue several layers together on top of one another, making it the ideal choice for automobile painting.
- Type of adhesive: Solvent (natural rubber), standard level of adhesive strength
- The tape is fully waterproof and UV resistant
- For use outdoors and in direct sunlight
- Recommended hourly rate for removal from the surface: 240h
- Resistant to extremely high temperature: up to 100°C
- Color: orange

MASKING TAPE **DOOR&WINDOW**

- Purpose: to protect the doors and windows when moving
- Type of adhesive: Solvent (natural rubber)
- Easily tear tape, leaving no traces of adhesive
- The elasticity of the paper ensures that the inaccessible parts of the joinery are covered
- Recommended removal time: 48h
- High temperature resistant: up to 80°C
- Color: blue

MA20	8606007991222	383gr	650mm

SPIRAL **STIRRER**
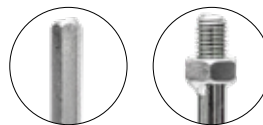

CYLINDRICAL TOOL ACCEPTANCE   M14 TREAD

- Mixer with a "fast" coil for mixing thin and medium-thick plasters and adhesives

CODE	BARCODE	THREAD	DIMENSION
MMLSM14	8606017653110	M14	140X600mm
MMLS110	8606017653127	Cylindrical tool acceptance	110x500mm
MMLS140	8606017653134	Cylindrical tool acceptance	140x600mm

DOUBLE SPIRAL **STIRRER**
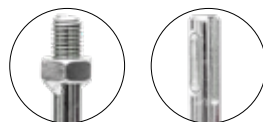

M14 THREAD   SDS+ CONNECTION

- Mixer with two coils made of flat metal enables extremely fast and high quality mixing of all types of mortars and adhesives

CODE	BARCODE	THREAD	DIMENSION
MMLDSM14	8606017653141	M14	130X600mm
MMLDSSDS	8606017653158	SDS	95X500mm

ROUND **STIRRER**

CYLINDRICAL TOOL ACCEPTANCE   M14 THREAD   SDS+ CONNECTION
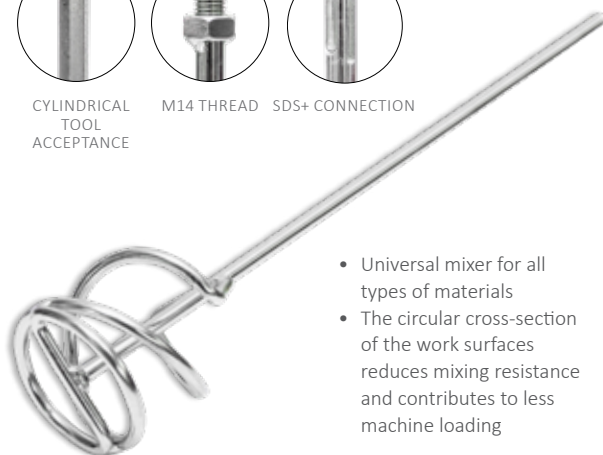

- Universal mixer for all types of materials
- The circular cross-section of the work surfaces reduces mixing resistance and contributes to less machine loading

CODE	BARCODE	THREAD	DIMENSION
MMLOM14	8606017653165	M14	95x600mm
MMLOSDS	8606017653172	SDS	90x500mm
MMLO80	8606017653189	Cylindrical tool acceptance	80x500mm
MMLO90	8606017653196	Cylindrical tool acceptance	90x500mm

CAGE **STIRRER**

CYLINDRICAL TOOL ACCEPTANCE   M14 THREAD   SDS+ CONNECTION

- Universal mixer for all types of materials
- The circular cross-section of the work surfaces reduces mixing resistance and contributes to less machine loading

CODE	BARCODE	THREAD	DIMENSION
MMLKM14	8606017653202	M14	100X500mm
MMLKSDS	8606017653219	SDS	100X500mm
MMLK80	8606017653226	Cylindrical tool acceptance	80X500mm
MMLK100	8606017653233	Cylindrical tool acceptance	100X500mm

TRIPLE SPIRAL **STIRRER**

M14 THREAD

- Three-coil mixer for working with mortar and adhesive
- Three helixes allow for quick and high-quality material mixing but also require a high power machine

CODE	BARCODE	THREAD	DIMENSION
MMLTSM14	8606017653240	M14	135x600mm

PLASTIC **STIRRER**

M14 THREAD   CYLINDRICAL TOOL ACCEPTANCE
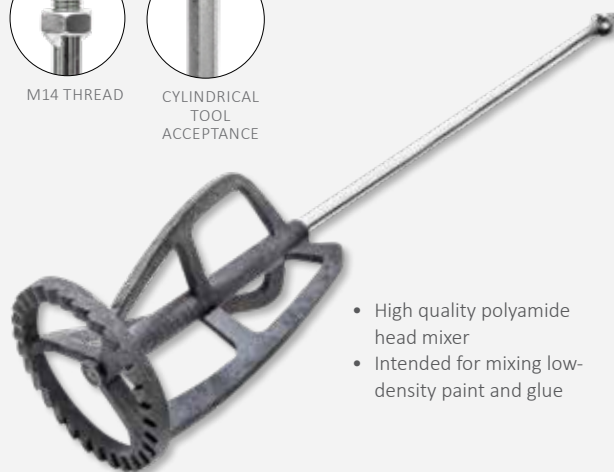

- High quality polyamide head mixer
- Intended for mixing low-density paint and glue

CODE	BARCODE	THREAD	DIMENSION
MFLPM14	8606017653257	M14	100X600mm
MFLP100	8606017653264	Cylindrical tool acceptance	100X500mm

JOINT **STIRRER**

CYLINDRICAL
TOOL
ACCEPTANCE

- For mixing joint joints, including epoxy compounds

CODE	BARCODE	THREAD	DIMENSION
MMF75	8606017653271	Cylindrical thread	75X300mm

PAINT **STIRRER**

CYLINDRICAL
TOOL
ACCEPTANCE

- Mixer for quick mixing of paint
- Cylindrical acceptance
- Dimensions: 75x500mm

CODE	BARCODE	THREAD	DIMENSION
MF75	8606017653288	Cylindrical tool acceptance	75X500mm

LEVELING COMPOUND MIXER

CYLINDRICAL
TOOL
ACCEPTANCE
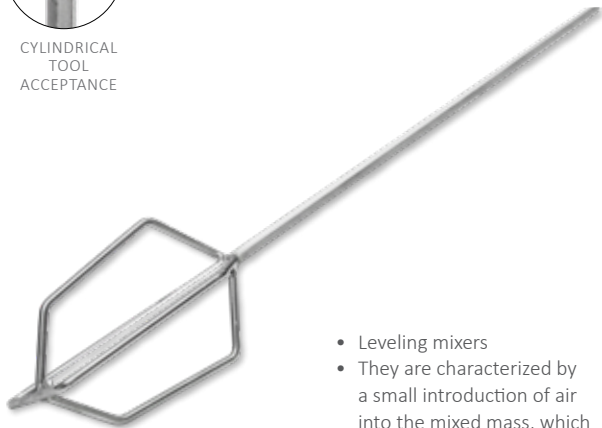

- Leveling mixers
- They are characterized by a small introduction of air into the mixed mass, which is very important with these materials

CODE	BARCODE	THREAD	DIMENSION
MFML115	8606017653318	Cylindrical thread	115X660mm

PLASTIC PAINT **STIRRER**

CYLINDRICAL
TOOL
ACCEPTANCE

- Mixer for quick mixing of paint

CODE	BARCODE	THREAD	DIMENSION
MFP80	8606017653295	Cylindrical tool acceptance	80X500mm

SANDPAPER HOLDER WITH MECHANISM - LARGE

- Sandpaper holder with mechanism for firmer bonding of sandpaper

CODE	BARCODE	MATERIAL	DIMENSION
DSMV	8606007990751	PVC	210×105mm

SANDPAPER HOLDER WITH MECHANISM - SMALL

- Sandpaper holder with mechanism for firmer bonding of sandpaper

PROFESSIONAL TILE LEVEL SYSTEM

The Beorol leveling system is used to assist ceramists in setting tiles. Using this method guarantees easy, fast and accurate mounting. Fitted with 1, 1.5 and 2mm joints and 4-13 mm tiles.

STEP 1

Put the clamp under the tile about 5cm from each end and lay the rest.

STEP 2

Insert the wedge into the hole on the clamp.

STEP 3

With a clamping force of forceps, the edge of the tile does not align.

STEP 4

After 12 hours, remove the clamp with a rubber hammer from the direction of the joint.

RUBBER TROWEL FOR GROUTING PROFESSIONAL

- Purpose: A tool for applying grout material
- Anatomical, handle, different rounded corners

CODE	BARCODE	DIMENSION	RUBBER

SPREADING BOARD WITH SOFT SPONGE

- SOFT sponge feather trowel with ABS handle
- Thickness of sponge: 20mm

CODE	BARCODE	MATERIAL	DIMENSION
PSS20	8606104807549	ABS + sponge SOFT	280x140mm

SPREADING BOARD WITH EVA

- Fluffy Trowel with ABS handle
- Tire thickness: 8mm

CODE	BARCODE	MATERIAL	DIMENSION
PG	8606007991550	ABS + rubber	280x140mm

SPREADING BOARD WITH SEGMENTED SPONGE

- Ceramic sponge for tile flushing
- The sponge is cut into segments or squares to pick up as much dirt as possible
- Thickness of sponge: 30mm

CODE	BARCODE	MATERIAL	DIMENSION
PSSG30	8606017650386	ABS + sponge	280x140mm

SPREADING BOARD WITH COARSE SPONGE

- Ceramic sponge for tile flushing
- The sponge is intended for use on large floor tiles
- Thickness of sponge: 30mm

CODE	BARCODE	MATERIAL	DIMENSION
PSG30	8606017651574	ABS + sponge	280x140mm

SPREADING BOARD WITH HYDRO SPONGE

- Ceramic sponge for tile flushing
- Thickness of sponge: 30mm

CODE	BARCODE	MATERIAL	DIMENSION
PSH30	8606017651581	ABS+ sponge	280x140mm

TILING SPONGE COARSE

- A sponge designed for flushing tiles. The exceptional water absorption power makes it easy to remove excess grout material
- They are intended primarily for work on smaller areas and difficult to reach places

CODE	BARCODE	DIMENSION	SPONGE
SKG	8606017651598	16 x 11cm	Rough

TILING SPONGE HYDRO

- A sponge designed for flushing tiles when grouting. The exceptional power of water absorption makes it easy to remove excess grout material
- They are intended primarily for work on smaller areas and hard to reach places

CODE	BARCODE	DIMENSION	SPONGE
SKH	8606017651604	160 x 110mm	Hydro

TILING BUCKET 20l

- Purpose: To rinse the tile cleaning sponge
- During grouting, frequent and thorough flushing of the sponge sponge is required, and this bucket is a professional tool that facilitates and speeds up this work
- Three angled rollers allow quick and thorough spraying of the sponge
- Eyelids make it easy to manipulate the bucket, and the net inside the bucket protects the sponge from contact with material already removed
- Volume: 20lit
- Dimensions: 510 x 260 x 260mm
- Color: red
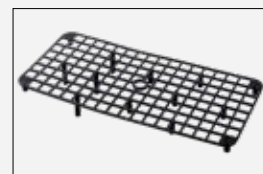

CODE	BARCODE	DIMENSION	VOLUME
KK20L	8606007990973	510 X 260 X 260mm	20l

VACUUM SUCTION LIFTER-SINGLE CUP

- To carry, move and place ceramic, granite and all similar slabs on a smooth surface
- The mechanism makes it easy to operate with only one hand
- Dimension: ø115mm

VGJ	8606017655053	Plastic/rubber	Ø115mm

ROLLERS FOR TILING BUCKET (SPARE)

- Spare Roller Set for KK20L Ceramic Bucket
- Made of high quality plastic
- Provides quick and thorough drying of the sponge

CODE	BARCODE	MATERIAL	DIAMETER
VKK	8606017659808	PP Polypropylene

POWDERED CHALK-BLUE

- It is used directly for marking in construction, and with the help of marking thread we also get the possibility of vertical and horizontal marking on the walls to help with interior work
- Material: Pure oxide pigment powder

CODE	BARCODE	COLOR	WEIGHT
PP	8606007991574	Blue	60gr

CHALK POWDER

- Pure oxyde powder pigment
- Applied directly for construction marking, and by using marking thread we have the possibility of vertical and horizontal wall marking which is helpful in interior work

CODE	BARCODE	COLOR	WEIGHT
GKP	8606107185347	Blue	180gr

UTILITY KNIFE, PROFESSIONAL, 6 SPARE BLADES

- Professional utility knife with rubberized metal housing, giving it firmness and better grip in the hand
- Designed for demanding work, with the possibility of cutting the blade in stride
- The body of the scalpel has a bladder with 6 quality blades

CODE	BARCODE	HOUSING	BLADE
SP6	8606007990966	Metal + Rubber	18mm

UTILITY KNIFE, PROFESSIONAL, 5 SPARE BLADES

- The utility knife housing is reinforced and made of metal, additionally rubberized
- At the top of the scalpel, there is a separate section for removing insulation from the power wires
- Inside the body of the scalpel is a cartridge with 5 easily replaceable blades

CODE	BARCODE	HOUSING	BLADE
SP5	8606007991871	Metal + rubber	Unbreakable blade

UTILITY KNIFE WITH METAL JACKET

- Utility knifel designed for all repairman who need brittle blades
- Combination of metal guides with PVC handle
- Has adjustable blade pullout as well as blade locking brakes

CODE	BARCODE	HOUSING	BLADE
SPM9	8600102481008	Metal + PVC	9mm
SPM18	8606007991901	Metal + PVC	18mm

UTILITY KNIFE, SOFT HANDLE

- Quality utility knife with metal guides and metal ergonomic handle
- The exceptional strength of the scalpel allows the master to complete even the most demanding cutting jobs
- Uses brittle blades

CODE	BARCODE	HOUSING	BLADE
SPMS9	8606007994933	Metal	9mm
SPMS18	8606007994926	Metal	18mm

UTILITY KNIFE

- Utility knife housing made of high quality PVC
- The scalpel is for all masters
- Uses brittle blades

CODE	BARCODE	HOUSING	BLADE
SP9	8606007991888	PVC	9mm
SP18	8606007991857	PVC	18mm

UTILITY KNIFE OFFICE

- Utility knife housing made of high quality PVC
- The scalpel is designed for all repairman, and because of its shape is ideal for office use
- Uses brittle blades

CODE	BARCODE	HOUSING	BLADE
SPO9	8606106732092	PVC	9mm

UTILITY KNIFE, PROFESSIONAL, 3 SPARE BLADES

- Robust, reinforced metal housing, extra rubberised
- Inside the body of the scalpel is a stapler with 3 easily replaceable blades
- Uses unbreakable trapezoidal or hooked blades

| SP3 | 8606007991864 | Metal + Rubber | Unbreakable blade |

UTILITY KNIFE WITH FIXING SCREW 25mm

- Quality scalpel with metal body coated with PVC
- The advantage of this scalpel is its precise adjustment of the blade, using a fixing screw
- Uses 25mm brittle blades

| SPF25 | 8606017655879 | Metal + PVC | 25mm |

UTILITY KNIFE WITH FIXING SCREW

- Quality scalpel with metal body coated with PVC
- The advantage of this scalpel is its precise adjustment of the blade, using a fixing screw
- Uses 18mm brittle blades

CODE	BARCODE	HOUSING	BLADE
SPF	8606007991895	Metal + PVC	18mm

UTILITY KNIFE FOR PRECISE CUTTING, 6 BLADES

- Handle is made in combination of metal tires
- There are six spare blades in the set that can be used for various purposes when precise cutting is required
- The packaging is plastic with a knife storage location that is not used

CODE	BARCODE	HOUSING	SET
SPS6	8606106732085	Metal + rubber	6 pcs

UTILITY KNIFES, 3pcs set

- The set consists of two 9mm scalpels and one 18mm
- Scalpel housings are made of high quality PVC
- They use brittle blades

CODE	BARCODE	HOUSING	SET
SPSET	8606007990393	PVC	2×9mm, 1×18mm

UTILITY KNIFES, 3pcs. set with extra blades

- The set consists of high quality scalpels with metal guide and PVC housing
- The set includes two 9mm scalpels, one 18mm scalpel and spare fragile blades of 9 and 18mm

CODE	BARCODE	HOUSING	SET
SPSET5	8606007994247	Metal + PVC	2×9mm, 1×18mm

BLADES

- Packs of 10 fragile scalpel blades

HACKSAW PVC HANDLE

- Purpose: 30cm metal saw
- Quick replacement of the saw blade
- High quality PVC handle for comfortable grip

CODE	BARCODE	HANDLE	DIMENSION
TMPVC30	8606007992021	PVC	30cm

CARBON STEEL SAW / SPARE

- Quality PVC handle
- Sheet saw blade- tooth size 24TPI
- The saw blade comes in a pack of 15 pcs

CODE	BARCODE	MATERIAL	DIMENSION
TZM	8606007996005	Handle- PVC	30cm
LTM30	8606107185361	Saw blade- Hardened steel	30cm

LIGHT CONCRETE HAND SAW *70cm*

- Hand tools that can cut lighter building elements using strong construction and quality teeth
- The sheet is made of high quality manganese steel with 15mm hard metal teeth
- The handle is made of a combination of metal, plastic and TPR

GYPSUM SAW SOUBLESIDED

- Purpose: for cutting gypsum. It has very sharp triple-brushed and hardened teeth, made from three angles, is suitable for cutting in both directions, drilling and trimming
- Handle made of TPR (thermoplastic) material, comfortable to hold, ergonomic shape

CODE	BARCODE	MATERIAL	DIMENSION
TGO15	8606007995749	TPR + Steel	15 cm

WOOD SAW / SPARE

- The front and rear handles are made of TPR (thermoplastic) material, the rear handle has a hand guard
- The sheet is made of special steel, which extends the service life
- Double-angle teeth (cutting in both directions) and are very sharp

CODE	BARCODE	MATERIAL	DIMENSION
TD45	8606007992557	Steel	45cm
TD76	8606007992588	Steel	76cm

LTD76	8606007991444	Tempered steel	76cm

WOOD SAW WITH CASE

- Special sheet coating reduces the force required for cutting
- Sheet thickness is 1mm. The teeth were induction hardened by 55 Rockwell hardness
- Handle made of fine composite plastic and TPR (thermoplastic) material

CODE	BARCODE	MATERIAL	DIMENSION
TDF	8606107185354	Steel / TRP	55cm

WOOD SAW

- Handle design for comfort and control when cutting
- Teeth are induction hardened, 55 Rockwell hardness
- Sheet thickness 1 mm

CODE	BARCODE	MATERIAL	DIMENSION
TD55	8606007991949	Steel	55cm

WOOD SAW WITH ADJUSTABLE HANDLE

- Setting five different cutting angles
- Tooth making is double angle (cutting in both directions)
- The sheet is made of high quality elastic steel

CODE	BARCODE	MATERIAL	DIMENSION
TDPR30	8600102480896	Steel	35cm

MITER BOX & SAW

- Used for cutting wooden strips (engraving)
- The teeth of the saw are triple made, induction hardened and reinforced, and no re-sharpening is required
- Measuring edge pattern, made of ABS material and with excellent mechanical properties

CODE	BARCODE	MATERIAL	DIMENSION
GABS30	8606107185378	Steel / ABS	30cm

U-TYPE MITRE BOX WITH SAW

HOLLOW-WALL PLASTIC ANCHOR

- Primarily intended for use in hollow gypsum, block or perforated brick walls but can also be used for all other materials that are solid: concrete, wood, brick
- Their biggest advantage is that, by their creasing, they adapt to the inside shape of the hole and fill in any imperfections that occur either when drilling the hole or because of the texture of the material itself
- When screwing in, the screw is pulled towards the edge of the hole and it is essential that the screw is screwed in completely, ensuring the best fit

PPS821P	8606104807211	821gr	Gun

PU FOAM CLEANER

- Prevents the tip of the gun from getting clogged, the best effect is
- Achieved if used immediately after using the gun, pushing the retaining foam that hardens, prevents the gun sprayer from being
- Clogged, allows cleaning of the spray valve
- Application: Cleaning of pur foam gun and spray valve

CODE	BARCODE	PACKAGING	USAGE
PPC	8606007998542	500ml	Gun

MULTIFIX HYBRID TRANSPARENT

- Multi Fix is a one-component adhesive for bonding, insulation and breathability
- Used in construction and auto industry as well as in shipbuilding
- Can be used for breathing joints in contact with water and air, for building joints exposed to vibrations, roof coverings, vacuum systems, containers, tanks, silos and floor joints

CODE	BARCODE	PACKAGING	COLOR
MFHT	8606107779966	290ml	Transparent

PU FLEX AS

- Polyurethane Flex is a one-component polyurethane-based permanent elastic adhesive
- Application: for general use: gluing on concrete, brick, wood, metal, PVC materials, around windows and doors
- Used in the manufacture of cars, containers, etc.
- To seal holes that leak water, gas, air, dust

AQUARIUM SILICONE

- Beorol Aquarium Silicone is a permanently elastic one-piece silicone putty designed for sealing in exterior and interior work
- Main features: harmless to fish and aquatic life, excellent
- Bonding, high elasticity and stability, UV resistant and at temperatures from -50°C to + 200°C

CODE	BARCODE	PACKAGING	COLOR
SA	8606007997538	280ml	Transparent

ACRYLIC SEALANT

- Beorol acrylic putty is a one-piece, universal, acrylic sealant
- Material intended for sealing and filling cracks in exterior and interior work
- Main features: excellent bonding, high stability, no diluent, can be painted, resistant to temperatures from -10°C to + 80°C

CODE	BARCODE	PACKAGING	COLOR
AK	8606007997583	280ml	White

MONTAGE KIT

- It can be used for different types of mounting for exterior and interior work
- Application: for fixing different objects on bases made of stone, concrete, ceramics, bricks, plastic, wood, etc.
- Main Features: Extremely strong, resistant to weather, water and chemicals, can be used for absorbent and non-absorbent surfaces

CODE	BARCODE	PACKAGING	COLOR
MNK	8606007997576	290ml	Yellow
MNKT	8606107779935	50ml	Yellow

CRACK FILLER

- Beorol Wall Crack Filler is a one-component, universal, acrylic sealant designed to seal and fill cracks in exterior and interior work
- Specifically designed to fill cracks in walls and ceilings leaving a sandy structure that remains undetectable in later processing and painting
- Can also be used to seal composition between windows, walls, doors, wood, glass, ceramic tiles, metal and non-aggressive PVC

CODE	BARCODE	PACKAGING	COLOR
IPZ	8606007998504	280ml	White

SPRAY PAINT ANTICORROSIVE

Provides long-lasting corrosion protection for all metal surfaces

- Anti-corrosion spray provides metals with long-lasting corrosion protection
- Can be coated with subsequent coatings of suitable composition after complete drying
- Dust resistant after 10 minutes, touch after 20 minutes and complete drying achieved within 24 hours
- Resistant to all atmospheric influences
- Features: excellent coverage, high resistance, lead free pigment, fast drying, CFC free
- A 400ml bottle covers an area of 1.5-2m^2
- Resistant to temperatures of 100-120 °C

WHAT IS EN388 STANDARD?

This standard refers to protective qualities of gloves against mechanical risks. Protection against mechanical hazards is expressed by a pictogram followed by four numbers (performance levels), each representing test performance against a specific hazard.

1. Resistance to abrasion: based on the number of cycles required to abrade through the sample glove. Highest mark is 4.

2. Blade cut resistance: based on the number of cycles required to cut through the sample at a constant speed. Highest mark is 5

3. Tear resistance: based on the amount of force required to tear the sample. Highest mark is 4.

4. Puncture resistance: based on the amount of force required to pierce the sample with a standard sized point. Highest mark is 4.

MATRIX PROTECTIVE GLOVES

- Knit gloves for industry and workshops
- The embossed rubber glove allows the use of non-slip hand tools

THREE AND FIVE WAY SOCKED WITH GROUND

MAX. 3500W 250V~ 16A   **MAX.** 3500W 250V~ 16A

- Cordless portable connectors are intended for users who want to replace the extension cord housing independently
- They are designed so that it is not necessary to open the entire housing, but only the part where the connections are located
- Connections are made by properly positioning them in phase, zero and ground locations
- Only connect the PP to a single-phase AC socket with a maximum rated voltage of 250V and a rated current of 16A

CONNECTING WIRES TO THE PC:
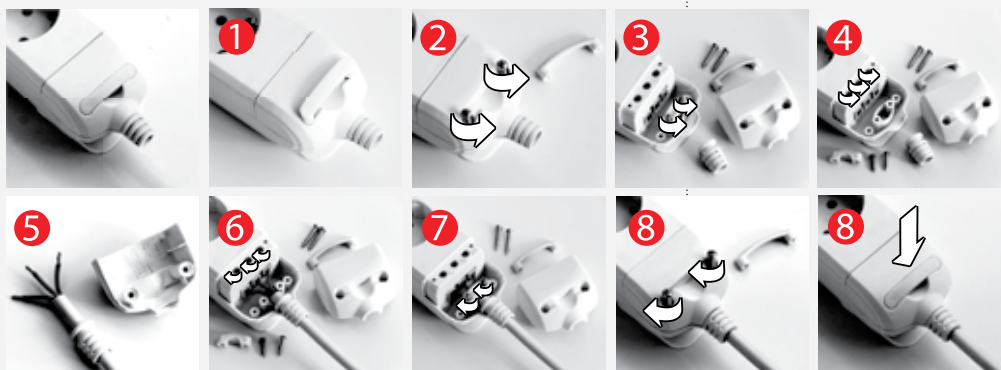

1. Remove the rubber screw protection
2. Unscrew the screws
3. Remove the protective terminal block
4. Unscrew and remove the cable fastener
5. Route the conductor through the grommet on the terminal block cover
6. Attach the unplugged conductor to the contact terminal, paying attention to the binding order (phase, ground, zero).
7. Tighten the conductor fixture and then replace the protective terminal block
8. Tighten the screws and replace the rubber guard

SINGLE PORTABLE SOCKET

- Ideal for household use with electrical appliances that cannot be connected to the existing network due to distances such as lawn mowers, power tools, lighting and other household appliances
- Orange color for easy detection in tall grass so as not to interfere with cable in lawn mowers
- Not intended for use in rain or wet areas

CODE	BARCODE	SOCKETS	LENGTH
EJPP15	8606017659242	1	15m
EJPP20	8606017651710	1	20m
EJPP30	8606017651727	1	30m

MAXIMUM POWER OF THE EXTENSION CABLE

Each electrical appliance must have the indicated power in watts, as this is the determinant used to calculate whether a particular appliance can be connected to the electrical outlet. Also, each extension cable must have an indication of how much current it can carry (with how many consumers it can load). If the extension cable is 3000 watts, it means that it can be connected to three consumers of 1000 watts or 30 consumers of 100 watts. Consumer forces always add up.

The strength of each conductor decreases the longer the conductor is due to the resistance each material has to the flow of current, so the longer the conductor the greater the thickness of the conductor is required. The thickness of the conductors is indicated by the number of wires or wires, the thickness of the wires and their surface. All Beorol cables are 3x1.5mm^2 - where 3 indicates the number of wires, 1.5mm^2 cross-sectional area of each conductor. These dimensions are sufficient for extension cables up to 50m long.
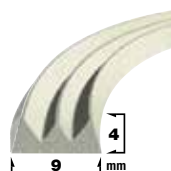

Max 1000W 230V~/4.3A
Max 3000W 230V~/13A

An additional "Child Protect" system can be seen on the sockets and is red. It provides protection if a foreign object is placed in the socket. If the cable is energized with this protection system, no circuit can form.
